Bargach FOUNDATION

Astra Towers, ASO 603, 6th Floor, South Tower, Action Area IIC Newtown, Kolkata, West Bengal 700016

Bargach Foundation was set up in July 2020 as a non-profit entity with the objective of bettering the lives of individuals from the weaker sections of society in semi-urban and rural locations. In its efforts to achieve the objective, the Foundation identified and commenced focusing on three critical areas – Drinking water, Sanitation and Skill Upliftment of youth. It has partnered with like-minded entities / organizations and acts as an implementation force for socially-conscious organizations.

Our work is aligned with Sustainable Development Goals as about:

Our Activities

1. Distribution of Food Packets during the Covid 19 Pandemic:

Nayagram Village, Jhargram District, West Bengal

COVID-19 or Coronavirus is a term the world has been uttering for almost two years now. The coronavirus disease is an infectious disease caused by SARS-CoV-2 virus. Since the birth of the pandemic, the world has shifted to a new normal where masks are the new accessory and sanitizers are used like sun cream. It was a devastating year for all of us. All the schools, Colleges and even the Offices were closed during that time. All the transport facilities like the buses, trains and airports were all closed, people were not allowed to move from one place to another. As the offices were closed during that time many people lost their jobs they were not getting proper salaries to sustain their families by not able to get proper medicines and other necessary items. Then **Bargach Foundation** has come up with a Nobel

Initiative of **Distributing Food Packets and Dry Ration Items** (Rice, Potato, Pulses, Oil, spices, sugar) to these needy households in the **Nayagram Village**, **Jhargram District** and in the **Pingla Village, Paschim Midnapur District of West Bengal** since food is necessity for all human beings to survive and thousands of daily wage labourers are impacted because of COVID-19 they have lose their jobs as a result they are not getting their income on a regular basis .This Nobel Initiative of **Distributing Food Packets and Dry Ration Items** has helped these daily wage labourers a lot during the Covid 19 Pandemic.

2. Water and Sanitation Project

The project involves necessary awareness creation at the beneficiary level on importance of safe drinking water on their life and livelihood. The project also involves making safe drinking water available to beneficiaries at community level. The project involves making safe drinking water available to beneficiaries at community level. The goal of the program is to create awareness on safe drinking water and making the availability of drinking water at the community level. Initially, villages were selected from the districts of West Bengal (from East Midnapore, West Midnapore, Contai, Jhargram) for implementing the program. The greater focus was to obtain the interest of community for promoting community facilities. The Foundation aims to raise awareness across 100 villages and build along with the local community, suitable drinking water facilities by the year 2023. It is observed that a few factors like lack of money, unavailability of robust toilet design and lack of cost-effective construction support etc. pose as a hindrance to household sanitation. The goal of the program is to sensitize beneficiaries at the community level to understand the importance of sanitation and use of the community facilities. The Foundation will educate individuals on the perils of open defecation. The goal being to set 1000 toilets across 100 villages to serve the community by year 2023.
